

SAFETY IN OUR ENVIRONMENT

By :Shemar Hondras

Why safety in our environment is important

Because every day someone life is taken for some reason for the cause of gun violence or any type violence going on around the world.

The Children

How it affects children

School safety is important to keep the children from harm to not have them end up dead. Some kids don't even get to experience life or have childhood all because their life was taken. We should take action for the violence going on in our city today's violence is getting out of hand now; been going on for too long for years now.

There have been many of victims who have reached adult age yet who died from, violence in a community or at a school. These kids had dreams to become something in the future but didn't get the chance because they lost their lives for some incident

What could possibly lead to shootings ?

1. A person couldn't be in the right state of mind at the time.
2. Maybe the person is going through something at home.
3. Students getting bullied at school or house drama
4. Bad influence

Gun Facts

- 
1. *There has been 291 victims killed by guns on the united states 2019 which is crazy i never expected so many lives to be taken and it hasn't been a year yet .*
 2. *There is about 131 children shot killed or injured in the U.S 2019 very insane innocent children lives being taken*

What should we do about it ?

We Should.....

- *We should limit the guns put onto streets or the amount of guns sold at stores this would allow the violence in school communities , neighborhoods etc to decrease .*
- *Second We should limit the guns put onto streets or the amount of guns sold at stores this would allow the violence in school communities , neighborhoods etc to decrease .*
- *Third should limit the guns put onto streets or the amount of guns sold at stores this would allow the violence in school communities , neighborhoods etc to decrease .*
